>

The PagerDuty App for Splunk turns operational intelligence and insights from Splunk into *real-time, orchestrated action* across the enterprise. PagerDuty applies routing logic, machine learning, and automation to Splunk alerts, aligning teams to mobilize people around issues that matter in real-time. By integrating Splunk with PagerDuty, teams can clearly align machine data with service impact, rapidly resolve and prevent incidents, and learn from past problems to measurably improve their digital operations.

splunk>enterprise

ALERT · CONTEXT · ESCALATE · RESPOND · LEARN
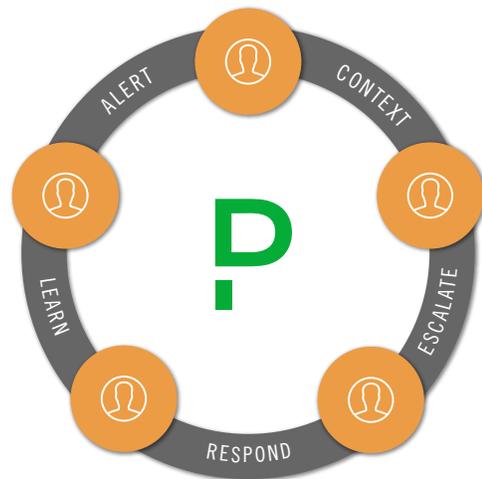

Focus On What Matters

PagerDuty automatically groups related events from Splunk and other data sources into incidents, surfacing remediation details alongside machine context.

Understand Service Impact

Connect your Splunk instance to services defined in PagerDuty to understand business impact of critical incidents.

Turn Data Into Action

Best-in-class response orchestration ensures relevant Splunk data is always delivered to the right people, in the right way, in real-time.

PAGERDUTY + SPLUNK PROVEN CUSTOMER SUCCESSES

THE WORLD BANK   HYATT   COMCAST   SEPHORA

"Our shift to symptom-based alerting [using Splunk and PagerDuty] has paid dividends and has allowed us to detect issues and react faster, making our site more stable and providing a better experience for our fans. Doing this while ensuring that our developers don't get woken up by noisy alerts also makes for happier developers."

– *ticketmaster* ®

DevOps and ITOps teams need a solution that enables them to improve signal to noise and focus on the most critical infrastructure and application issues in order to deliver exceptional digital services. The certified PagerDuty App for Splunk makes it easy to turn machine data from Splunk and other solutions into action and resolution, with a focus on applied machine learning for intelligent decisions, advanced response automation, business-wide orchestration, analytics, and much more.

PAGERDUTY DIGITAL OPERATIONS PLATFORM + SPLUNK:

Event Intelligence & Automation

Solve the problems that matter with automated alert grouping powered by machine learning, suppression of non-actionable events, and much more.

Automated Precision Response

Design the perfect response for any impact level, then execute it automatically when needed. Go from signal to action in seconds and eliminate manual work when it matters most.

Business-Wide Orchestration

Engage the right staff across any department during critical issues. PagerDuty's operational insights also empower managers to understand responder, team, and service health.
